

Aktion Analytics for Construction

Aktion Analytics for Construction is a powerful business intelligence tool built for the construction industry. With Aktion Analytics, you have the power of decision enablement in a consumable format – giving you the ability to run your construction business with confidence. When data is consolidated across all divisions, you boost margins and turn profits.

Business intelligence brings multiple data sources together to form a single source of truth. Your decision-making is based on core principles viewed through easy-to-use dashboards. Each of these dashboards is designed with a full suite of analytics for finance, budgeting and forecasting. Business success depends on the ability to pinpoint the metrics that are critical. Quickly measure variance and analyze the KPIs that matter to your company and industry.

Aktion Analytics users have the benefit of improved decision-making and the ability to collaborate more efficiently with sales, purchasing, finance, marketing, IT and the executive team. The reporting is built with multiple levels within your organization in mind. The right data for the right people - when they need it.

Contact your Aktion Account Manager today to learn more about Aktion Analytics for Construction.
