Acumatica Construction

Aktion was named Acumatica Construction partner of the year 2021. Acumatica Construction is an innovative, cloud-based ERP system to provide real-time accounting and project management for general contractors, subcontractors, specialty contractors and land developers; improving margins and tightening controls throughout the project lifecycle.

Sage Intacct Construction

Sage Intacct Construction is a modern, cloud-based construction financial management solution. With Sage Intacct, your project costing and billing is managed all in one place. Stay on top of project costs and keep projects productive and profitable.

Sage Construction Management

Sage Construction Management is a powerful cloud-based platform that streamlines business operations, improves project execution, and enhances collaboration with real-time project information. Sage Construction Management seamlessly integrates with Sage Intacct Construction, allowing you to manage finances and operations data in one place.

Sage 100 Contractor and Sage 300 CRE

The widely used software solutions for the construction industry, Sage 100 Contractor and Sage 300 CRE are the ideal project management software solutions for growing construction businesses. Both come standard with comprehensive functions including accounting, estimating, job cost, project management, and more. Data analytics and reporting help you to gain valuable insights to improve margins and efficiency, now and in the future

Sage Estimating

Sage Estimating is a software tool to help create accurate, timely proposals to increase your bid-to-win ratio. Pre-populated or custom cost databases enable precise estimates, 2D or 3D content, and seamless integration with all leading CRE software products.

ISV
PARTNER
PROGRAM

Independent Software Solutions (ISVs): Aktion offers a wide range of third-party applications, which can extend the functionality of your primary software system.

Considering A Next-Gen Solution?

We know that over time, your ERP solution no longer delivers the results you are looking for. At Aktion, we want to facilitate a dialogue that leads to a proactive approach to IT initiatives. We created a blueprint to help customers understand their IT options and make informed decisions on a technology strategy. We understand that the process of migrating to a new ERP can be a daunting process.

Characteristics of Companies Migrating to Next-Gen Software

Software is not meeting business requirements	✓
Business requires a modern application	✓
Need web-enabled, open database, mobility	✓
Desire to move applications to the cloud	✓
Vendor not providing adequate migration option	✓
New employee influencers	✓

Are you ready for a business where downtime and lost profits are a thing of the past?

Aktion Managed Services

An always-on business is a reality with Aktion's Managed Services, a suite of proactive management services and tools developed specifically for your application and industry.

Most managed service providers force you to conform to a generic, one-size-fits-all services model. These providers disregard key elements that make your business unique and successful.

Our Managed Services and Cloud Services programs have consistently delivered excellence in private cloud hosting and on-premise network management. Aktion's range of Managed Service plans can augment your existing IT department or provide complete IT support for a fraction of the cost of staffing one yourself. This ensures that your environment runs predictably, optimally, and securely.

Combining IT expertise with industry experience gives you the best in Managed Services and Cloud Services. Contact us today and let us give you the insight you need to confidently step forward in modernizing your business technology.

Generic is not who you are. And it's not who we are, either.

What makes Aktion unique?

- We're one of the largest Acumatica and Sage Construction ERP software resellers in North America.
- Unparalleled construction and third-party application expertise
- Deep industry knowledge and offerings specific to Construction and Real Estate management
- We deliver high-value consultative services addressing business process improvement, including industry best practices and innovative technology solutions.
- For software implementations, our proprietary Lean Implementation process ensures a successful go-live.
- We're a nationally-recognized cloud and managed services provider solely focused on the construction & real estate industries.
- Aktion is a trusted technology provider that delivers everything a contractor needs to drive transformation.
