

DIGITAL OPERATIONS PLATFORM

# Distribution

CloudSuite Distribution is a comprehensive, scalable cloud solution designed for wholesale distributors who are focused on growth, customer engagement, and have demands for extended services. This ready-to-run solution provides capabilities that encompass everything from inventory and warehouse management to financials, multi-channel sales orders, purchasing, value add services, and more.

With over 30 years of industry expertise, Infor has helped wholesale distributors around the world improve productivity.

### Supply chain

- Efficiently deliver near-perfect order fill rates for customers
- Offer value added services that differentiate your business
- Control operational and streamline business processes

### Workforce

- Intuitive and personal user experience improves user adoption
- Collaboration & role-based BI accelerates intelligent responsiveness
- Technology to recruit, train and retain the best talent

### Assets

- Carry just the right amount of inventory in the right locations
- Improve cash flow via strong credit and collection management
- Minimize scheduled and un-scheduled downtime of delivery fleet

### Customer experience

- Provide customers a consistent positive experience across channels
- Get the right product to the right customer at the right time
- Provide not just the product but the service and information desired

To do more with fewer employees, we knew we needed to embrace technology. We now always have the latest version of CloudSuite Distribution to continue to scale and grow our business. The Infor cloud delivery model enables us to take advantage of new features as they are rolled out to provide better service to our customers "

- Christian Ostiguy, VP Operations, Drillmex Inc.
